ROACHES LAST STAND

"SPECIFICATION"

Roaches last stand is made out of plastic material. It looks like a small soap dish with a small leg in th center, on the side wall. on one side it stands ¼ inch to ½ inch from the surface, place trap face down depend on what size roaches you would like to trap. It has adhesive in the dish alone with some bait(Bread, Cake, or Pancake Crumbs) should be placed in the center of the adhesive trap.

The trap is placed face down as roaches try to get the bait. They become trapped in the glue. The trap will catch about 50 small, or 35 medium, or 3 or 4 large roaches. It will trap small to medium size roaches ¼ inch from the surface. At ½ inch from the surface it will trap small, medium and large roaches also.

The trap is place face down to trap roaches. Place trap face up it will trap RODENTS; Replace the trap every 3 months or as needed.
